

Nylon Anchors

Tri-Fixx Nylon Drive Anchors are light duty removable interference fit anchors that will fasten to a wide range of masonry substrates such as concrete, stone, brick and block. Available in a variety of head styles, these anchors only require a relatively small hole to be drilled for their installation, making them an ideal choice for discrete and fast fixings.

Installation Guidelines

1. Drill a hole with a diameter matching the anchor size and ensure the hole depth is at least the length of the anchor.
2. Insert the nylon drive anchor into the pre-drilled hole.
3. Strike the drive pin with a hammer until the anchor is fully set, ensuring flush installation.

Material Properties

Anchor Body:	High-quality UV-stabilised Nylon Polyamide-6, DuPont Zytel® 73G30L NC010 PA6-GF30, glass-fibre reinforced, min. 28% ash content
Drive-Pin:	Zinc-plated carbon steel (Q195L) or stainless 304
